## **The 4 STEP SYSTEM is the STATE OF THE ART.**

It COMBINES the power of clearing, hypnosis, subliminal & sleep learning.

The 4 steps are clearing, hypnotic, subliminal and sleep learning. Each on its own CD or download. All 4 have the exact same suggestions. The effect is synergistic.

**STEP 1.** The CLEARING is a hypnotic recording that reduces subconscious blocks to the suggestions. You consciously hear the hypnotists voice. It also allows the release of negative energy and influence in general making it one of the most beneficial techniques in modern hypnotherapy. The suggestions are subliminally implanted in the stream background. Track 1 is 30 minutes. Track 2 is 30 minutes.

**STEP 2.** The HYPNOTIC CUES the clearing, subliminal and sleep learning of the same title. You consciously hear the hypnotists voice. Track 1 takes you as deep into hypnosis as you wish. At the deepest level you are given hypnotic suggestions identical to the suggestions on the corresponding clearing, subliminal & sleep learning. A post hypnotic suggestion is given so that when you listen to the corresponding clearing, subliminal or sleep recording, the hypnotic suggestions are activated. This is called the INVOCATION OF A POST HYPNOTIC CUE and makes the subliminal and sleep learning recordings FAR more effective. Track 2 is a short booster and includes an opportunity for you to give your subconscious mind suggestion and visualization (allowing you to fine tune, upgrade and add new results). This makes it a versatile lifelong tool. Track 2 also includes basic self hypnosis training. The suggestions are subliminally implanted in the ocean background. Track 1 is 45 minutes. Track 2 is 16 minutes.

**STEP 3.** The SUBLIMINAL strengthens suggestions while you are active. You DO NOT consciously hear the hypnotists voice. Listening to this recording ACTIVATES the hypnotic suggestions put into your subconscious mind by the hypnotic recording. This is called the invocation of a POST HYPNOTIC CUE and makes these the most effective subliminal recordings available. This is far more effective than an ordinary subliminal recording. Ocean overlay. 60 minutes long.

**STEP 4.** The SLEEP LEARNING strengthens suggestions while you sleep. You DO NOT consciously hear the hypnotists voice. Also called hypnopedia. It also ACTIVATES the hypnotic suggestions put into your subconscious mind by the hypnotic recording. Designed to be played throughout your entire sleep period this recording is an extraordinarily efficient use of your time. The stream overlay helps mask outside noise helping you sleep. At the same time the suggestions are IMPLANTED deeper into your subconscious mind along with added suggestions for 1. DREAM INCUBATION: to dream the most enjoyable results of the suggestions into your reality, and 2. That you easily enter a deep, restful sleep when you wish and awaken when you should, refreshed and full of energy. Stream overlay. 60 minutes long.

## CUSTOM MADE INFORMATION

**WISHES CAN COME TRUE:** All of your wishes and dreams can come true thanks to our amazing and totally revolutionary custom made recordings. You can become the fantasy-role of your dreams with a **SENSE OF REALITY** you never thought possible. Every RPF recording is custom made to create your exact individual fantasy role. The process utilizes a hypnotic technique called a waking trance, in which you are fully awake yet remain partly in a trance. Our custom recordings produce results that are extremely dramatic and exciting. After listening to your hypnotic recording, you will actually become the fantasy person of your dreams. You will **BE** whatever age and sex you wish and will feel and experience yourself as the person you want to be in your wildest fantasy. At the end of one hour after listening to the recordings, or longer if you prefer, you will be your old self again, but you will say, "Wow, that was fantastic, I can hardly believe it wasn't real". Best of all, you can use your recordings over and over again to become your dream any time you want.

**YOUR FANTASY:** How many times have you wished that you could truly experience yourself in the fantasy of your wildest dreams, even just for a short time? How often have you wished that you could experience yourself as a real baby and have the feelings and behavior of a real baby? Maybe you would like to experience yourself as a teenage boy who is terribly humiliated when he accidentally wets his pants in school? Maybe you would like to become the fantasy person in your wildest dreams, and feel and experience all the exotic and erotic feelings of that person? Your fantasy-role need not even be logical. For some people illogical roles are more exciting. An example of an illogical role would be a teenage boy who feels and acts like a toddler. Nothing like these recordings has ever been available before, anywhere.

**SHARE WITH ANOTHER PERSON:** You can share you fantasy with another person who can play the role of your mommy, daddy, brother, friend, etc. The other person does not listen to your recordings, but simply plays along with your fantasy. For you, however, that person's role becomes

**TOTALLY REAL** during your fantasy. For example, if the other person is supposed to be your mommy, you will believe that the other person **REALLY IS** your mommy.

**CUE PROCESS:** A cue is a simple action which instantly puts you into your fantasy as effectively as if you had listened to the long or short track of your hypnotic. An example of a cue is simply pressing your thumb against your finger. The hypnotist will coach and assist you in creating your own personal cue.
